At Raytheon, you'll be a valuable team member whose accomplishments and contributions will never go unnoticed. We offer competitive salaries and a comprehensive benefits package and we are an Employment Equity employer. Raytheon is committed to Employment Equity and we encourage and welcome a wide diversity of applicants.

MANAGER I – PROGRAM MANAGEMENT

Duties / Responsibilities:

- Using demonstrated task management skills and the organizational resources available, execute programs within the technical/performance, cost and schedule specifications.
- Meet the Company's profit objectives for the program by formulating and executing business strategies to reduce risk, enhance customer satisfaction and build positive customer relationships
- Apply knowledge of financial & management metrics tools such as IPDS, EVMS and IPTs to provide and present monthly project reports and Earned Value (EV) using common tools available
- Applying a positive "can do" attitude, drive the required decisions to assure that the program objectives are met utilizing strong organizational and planning abilities.
- Be the prime point of contact for the program with the customer, senior management and functional management.
- Utilizing excellent leadership and interpersonal skills, integrate the efforts of all program contributors and provide active leadership of the project team.
- With the ability to interact with team members at every level, regularly report program status and utilize your ability to recognize trends and apply root cause/corrective action measures to alert senior management at any time that it appears that technical, cost, profit or schedule objectives will not be met.
- With a drive to be a self starter, lead proposal efforts as appropriate and produce international proposals.
- With excellent verbal and written communication skills, be the “**voice of the customer**” on the program

Education / Experience / Skills Required:

- Undergraduate engineering degree and relevant electronics industry experience including prior successful Program Management or Project Engineering experience
- Experience with bids and proposals would be an asset
- Familiar with financial & management metrics tools such as IPDS, EVMS, and IPTs.
