You will be part of a valuable team that allows you to be challenged and offers unique opportunities, working on projects that are making a positive impact on our world. Raytheon Canada offers competitive salaries and a comprehensive benefits package.

Integrated Logistics Support Analyst

The Integrated Logistics Support (ILS) Analyst is responsible for performing Logistics Support Analysis (LSA) tasks, management of the Logistics Support Analysis Record (LSAR), and analyzing available data to develop program support solutions for the various programs supported by Raytheon Canada Limited (RCL).

Job Duties:

- Gather in-service support and design data from active / proposed programs, manipulate, sanitize and enter into the LSAR.
- Review engineering data, interview Subject Matter Experts and identify the impact of the findings in the Logistics Support Analysis Record (LSAR).
- Analyze LSAR and other data to identify solutions to develop program support solutions, such as reliability improvements, supportability requirements, recommended Engineering Changes, develop maintenance plans, spares purchases, etc.
- Interface with engineering, management, production and customers to assist in any supportability, maintainability and testability issues.
- Perform various LSA task, such as Failure Modes Effects Criticality Analysis (FMECA), Reliability Centered Maintenance (RCM), Maintenance Task Analysis (MTA), Level of Repair Analysis (LORA), etc.
- Assist in the creation of various plans such as Integrated Logistics Support (ILS) Plans, Maintenance Plans, Provisioning Plans and Sustainment Plans.
- Assist other ILS staff as required, including providing analysis support to Obsolescence Management, Configuration Management, Supply Support, and ILS Management.
- Any other duties as assigned.

Requirements:

- A degree or diploma in any of the following technical disciplines, or equivalent levels of work experience: Electronics, Avionics or Engineering Technology (any applicable discipline).
- Must have 3+ years of ILS or related experience.
- Experience performing formal LSA tasks in accordance with industry standards.
- Experience developing plans and reports.
- Very strong mathematic and analytical capabilities.
- Expert skills in Microsoft Excel.
- An understanding of Integrated Logistics Support (ILS) processes and standards such as MIL-STD-1388-1A and 2B, ASD-S3000L, GEIA-STD-0007, etc.
- Intermediate skills in an LSAR Tool.
- Knowledge of configuration management practices and methods.
- The ability to write clear, concise and complete technical reports.
- The ability to display initiative in considering variables and trade-offs to solve non-routine problems.
- Working knowledge of SQL.
- Good oral communication skills.
- Eligibility to meet the Canadian Controlled Goods requirements and be able to hold a Canadian Security Clearance.

Other information:

Only those selected for an interview will be contacted. Interviewed candidate will be required to successfully complete a Criminal reference check and pass a security clearance check to a secret level through the Canadian Government.
